Hunjunude Taiwo Roland

FRONTEND DEVELOPER

Lagos, Nigeria · +234 704 898 7074 · rolandhunjunude60@gmail.com · github.com/Taiwo555

SUMMARY

Frontend developer in Lagos who builds interfaces for data-heavy products, and writes the layer underneath them when it does not exist — including a binary parser written from the format specification and verified field by field against Apple's own tooling. Currently completing a BSc in Business Administration alongside a professional diploma in IT.

SELECTED PROJECTS

binlens — Mach-O binary inspector binlens.netlify.app

github.com/Taiwo555/binlens

- Built a browser tool that reads macOS and iOS executables: load commands, segments, linked libraries, code signature, entitlements, strings and paged raw bytes.
- Wrote the parser from the format specification as roughly 1,250 lines of **DataView** reads with **zero parsing dependencies**, and moved it into a **Web Worker** so the interface stays responsive on 120 MB files.
- Verified every field against Apple's tools (**lipo**, **otool**, **codesign**); 55 tests at 99% statement coverage, including fuzz tests over truncated and malformed input.
- Virtualised the strings view to render 20,000+ entries without dropping frames; typecheck, test and build run in **GitHub Actions**.

Northbank — personal banking interface northbanks.netlify.app

github.com/Taiwo555/northbank

- Responsive account dashboard and transfer flow in **Next.js, React and TypeScript**, exported as a static build with no backend to operate.
- Modelled balances and transfers so the money logic is testable apart from the UI, and checked formatting and edge cases before styling the screens.
- Fixed a layout that broke the transfer form on phones after testing across 390–1440 px; removed the horizontal overflow that made amounts unreadable.

SKILLS

Languages	TypeScript, JavaScript (ES2023), HTML, CSS
Frontend	React 19, Next.js, Vite, responsive layout, component architecture, accessibility
Platform	Web Workers, ArrayBuffer and DataView, virtualised lists, performance profiling
Testing	Node test runner, unit and integration testing, fuzz testing, coverage analysis
Tooling	Git, GitHub Actions, npm, TypeScript, oxlint, Netlify, Vercel
Systems	Mach-O format, code signing, entitlements, implementing from specifications

EDUCATION

BSc, Business Administration — Lagos State University 2024 – present

Professional Diploma in Information Technology — NIIT, Lagos 2021 – 2024

Senior School Certificate (SSCE) — Johtech Senior Secondary School, Lagos 2016 – 2021
